EDUCATION

University of California, Los Angeles

Bachelor of Science in Computer Science, Minor in Creative Writing

Estimated Graduation June 2028

- GPA: 3.75
- Relevant Coursework: Introduction to Programming, Data Structures and Algorithms, Computer Organization, Software Construction, Programming Languages, Operating Systems Principles
- Clubs: ACM Cybersecurity Club, Society of Women Engineers

EXPERIENCE

Assistant Software Development Intern

June 2025 - September 2025

Google

Mountain View, CA

- Worked on the Payments platform, wrote protocol buffers, Java protobuf converters, UI field validators, a client generator, and tests.
- Implemented Java-based front-end and Java-based back-end simplifying the vendor's catalog experience, to be used by 8 integrators across Payments and beyond.
- Presented project to Payments and Commerce team members during midyear summit and a final presentation

Systems Engineering Intern

June 2023 - August 2023

The Boeing Company

Huntington Beach, CA

- Utilized physics and computer simulation skills to determine how best to use radars, radios, satellites, aircraft, etc., in different aerospace defense scenarios.
- Completed cost-benefit analysis for various defense scenario simulations
- Analyzed situations and communications between missiles, boats, planes, and satellites.

PROJECTS

Gacha Get-It-Done | *Node.js/Express.js, MySQL, Axios, React.js, Git*

- Worked collaboratively on a task and habit manager with a gamified gacha (random reward) component and social functions
- Connected database to backend, collaborated on login and registration backend implementation
- Implemented gacha functionality, created reward designs

ClubhouseUCLA | *Node.js, React.js, MySQL, Supabase, Git*

- Working collaboratively on web app for UCLA students to explore, review, and rate student organizations/clubs on campus.
- Features: Users can explore, like, rate, and review clubs at UCLA; User's can read and like other user's reviews, and see a club's overall community statistics. Users can see their own likes and reviews, and view user profiles
- Implemented review likes functionalities, sorting by club likes, and redirect functionalities, writing RESTful APIs

TECHNICAL SKILLS

Languages: Proficient in Java, C/C++, Python; Familiar with Javascript, MySQL, C#

Frameworks: React, Node.js

Developer Tools: Git, Google Cloud Platform, VS Code, Visual Studio, Eclipse, Unity3D

ADDITIONAL SKILLS/EXPERIENCES

- Organized local community and university outreach for 2025, 2026 LA Capture the Flag Competitions, ACM Cyber's flagship event, with 930 participating teams; Worked with 7 local high schools to invite students to compete in person and online
- Awarded highly selective National Security Language Initiative for Youth (NSLI-Y) scholarship from the U.S. State Department to study Mandarin at Tsinghua University in Hsinchu, Taiwan (2024).
- Intermediate Mandarin Chinese proficiency: Intermediate High Score on OPI exam
- Scholastic Arts & Writing Award (Flash Fiction Gold Key x1, Poetry Silver Key x1), 2022
- Editor for Gossamer Literature (2021, now defunct), an online student literature magazine
